I certify to the best of my knowledge, the above information is complete and accurate. If the health plan information is not accurate, or if I am not eligible to receive a health care benefit through this practitioner, I understand that I am liable for all charges for services rendered and I agree to notify this practitioner immediately whenever I have changes in my health condition or health plan coverage in the future. I understand that my chiropractor may need to contact my physician if my condition needs to be co-managed. Therefore I give authorization to my chiropractor to contact my physician, if necessary.

Patient Signature _____ Date _____

Informed Consent to Chiropractic/Massage Therapy Treatment

The nature of chiropractic treatment: The doctor will use his/her hands or a mechanical device in order to move your joints. You may feel a "click" or "pop", such as the noise when a knuckle is "cracked", and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound or dry hydrotherapy may also be used.

Possible Risks: As with any health care procedure, complications are possible following a chiropractic manipulation. Complications could include fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

Probability of risks occurring: The risks of complications due to chiropractic treatment have been described as "rare", about as often as complications are seen from the taking of a single aspirin tablet. The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. The probability of adverse reaction due to ancillary procedures is also considered "rare".

Other treatment options which could be considered may include the following:

- *Over-the-counter analgesics.* The risks of these medications include irritation to stomach, liver and kidneys, and other side effects in a significant number of cases.
- *Medical care,* typically anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include a multitude of undesirable side effects and patient dependence in a significant number of cases.
- *Hospitalization* in conjunction with medical care adds risk of exposure to virulent communicable disease in a significant number of cases.
- *Surgery* in conjunction with medical care adds the risks of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult.

Massage Therapy: I understand that the massage therapist is providing massage therapy services within their scope of practice as defined by Weymouth Corners Integrated Wellness.

I hereby consent for my therapist to treat me with massage therapy for the above noted purposes including such assessments, examinations, and techniques, which may be recommended, by my therapist.

I acknowledge that the therapist is not a physician and does not diagnose illness or disease or any other physical or mental disorder. I clearly understand that massage therapy is not a substitute for a medical examination. It is recommended that I attend my personal physician for any ailments that I may be experiencing. I acknowledge that no assurance or guarantee has been provided to me as to the results of the treatment. I acknowledge that with any treatment there can be risks and those risks have been explained to me and I assume those risks.

I acknowledge and understand that the therapist must be fully aware of my existing medical conditions. I have completed my medical history form as provided by my therapist and disclosed to the therapist all medical conditions affecting me. It is my responsibility to keep the massage therapist updated on my medical history. The information I have provided is true and complete to the best of my knowledge.

Unusual risks: I have had the following unusual risks of my case explained to me.

I have read the explanation above of chiropractic and or massage treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. By signing this form, I confirm my consent to treatment and intend this consent to cover the treatment discussed with me and such additional treatment as proposed by my doctor or therapist from time to time, to deal with my physical condition and for which I have sought treatment. I understand that at any time I may withdraw my consent and treatment will be stopped.
